8th April 2015

John Pierpoint & Brian Clarke
ReGen Building Solutions

Dear Sirs,

RE: Certificate of compliance – MEGABOARD cladding

This letter is provided as proof that FMG Engineering has examined testing materials relating to the cladding product 'MEGABOARD', provided by ReGen Building Solutions (formally AR Building Solutions) and certifies that, through these results, MEGABOARD has fire resistant properties comparable to fibre-cement sheeting and thus complies with AS 3959 – 2009 (inc. Amendment Nos 1, 2 and 3) cl. 8.6.6 (c). As such FMG Engineering certifies that MEGABOARD of 6mm thickness or greater may be used as an Eaves Lining in a BAL-40 compliant configuration provided all other relevant legislative requirements are met.

Yours sincerely

A handwritten signature in blue ink, appearing to read 'Rhys Flory'.
